VERBENA *Hybrida Grandiflora*

OUR ★ ★ ★ ★ NOVELTY **MARILYN** (Denholm) (New)

NEW VERBENA COMPACT HYBRIDA GRANDIFLORA
MARILYN

VERBENA *Hybrida Grandiflora* MARILYN

An entirely new color in Verbena. A fiery cerise with a suggestion of scarlet. A small cream eye adds loveliness to this charming color. The underlying tone of warm iridescent brilliance brings into full appreciation the rich striking beauty of this new Verbena.

MARILYN'S radiant brilliance in no way suggests a harsh color. To the contrary it suggests a warm, inviting and comfortable color, such as one would enjoy from the lively coals of a night camp-fire. A charming color indeed.

The mammoth clusters of large florets are generously produced on fine uniform plants of the compact habit. This is an early strain that will bloom over an extra long season.

EXTRA EARLY AND
EXTRA FREE FLOWERING (Denholm) (New)

MARIGOLD DWARF CARNATION FLOWERED
SUNBRITE

MARIGOLD *Dwarf Carnation Flowered* SUNBRITE

An extremely early, medium height, golden yellow in the Carnation type, which will bloom two to three weeks ahead of the other varieties in this class of Marigold.

The name of **SUNBRITE** was suggested by the brilliant, rich, yellow color that is so bright and charming. The blooms are fully double, being made up of crinkly wax-like petals that seem to be crowding each other a bit for an opportunity to be seen.

Besides being so very early, this new strain produces many more blooms per plant at one time than any Marigold of this type that we have seen. The blooms are good sizes, too, measuring from 3 to 3½ ins. across. The plant habit is so uniform that plants set close together in a row produces the effect of a dwarf hedge. Height 12 to 15 ins.

Price . . . \$3.50 per oz.

Plants are trim and uniform. There are more colors and color combinations than we have ever seen in Marigolds.

This strain has been developed for florist and flat growers use, but it has also proven to be a real fine home garden subject. The extra early flowering characteristics, especially in flats, has made this new strain a favorite with the bedding plant people. Also very fine for pot culture.

MASTER BLEND (DENHOLM)

The production of the very finest quality Petunia seed, particularly the large flowered strains, has long been one of our specialties. Each year we devote some of our best land, and a great deal of effort and know-how to our Petunia workshop and production. **MASTER BLEND** is the elite of our Petunia program.

The best and brightest colors are selected from our renowned strains, and seed from these special plants is then grown in separate blocks. Every bloom is hand pollinated, and seed from each plant is saved separately. From these special lots of seed is made a beautiful blend according to a well tried formula, assuring you of getting the same wonderful quality on every order.

From our Petunia workshop we are continually adding new colors to the **MASTER BLEND** formula. In this blend you will find Rose, Copper and Pinks that are not available in any other strain.

SPARKLE AND CRYSTAL

2 FINE NEW VARIETIES

VERBENA DWARF COMPACT CRYSTAL

A completely new class of Verbena. The dwarf, compact plants retain their trim and neat habit throughout the entire blooming season. The open or bare spots that are common in the center of the plants in regular strains, have been fully eliminated in this new class of Verbena.

Dwarf Compact SPARKLE

(DENHOLM) (NEW)

A neat, dwarf, tightly formed plant which grows about 10 ins. tall with a spread of approximately 12 ins. The cluster-like blooms are made up of from 40 to 50 grandiflora size florets.

A bright scarlet red color that is greatly intensified by a large white eye. The brightest Verbena that we have ever seen.

from Schmidt Lithograph Co.,

Dwarf Compact CRYSTAL

(DENHOLM) (NEW)

Our second introduction in this new class is **CRYSTAL**; a pure white with the same large flowers and the same fine, neat and compact habit as Sparkle.

2 NEW SPECIAL FLORISTS VARIETIES

Under our field conditions, these two varieties bloom far ahead of all other strains. These are especially important varieties of Verbena for the bedding plant grower because they bloom in flats so very much ahead of the regular strains.

VERBENA DWARF UPRIGHT RAINBOW STRAIN

A lively blend of colors not common in separate varieties, to include: Buff, Apricot, Blue, Lavender and Mauve. A large share of the blooms have a large eye of a beautiful contrasting color. Upright habit.

\$2.50 per oz.

\$25.00 per lb.

VERBENA DWARF COMPACT IDEAL FLORIST STRAIN MIXED

The plants are dwarf and compact in habit. A full range of fine colors. There is a predominance of beautiful color combinations of the eyed kinds. This strain has been developed for florist's use, especially adapted for pot and flat culture.

Not upright and must not be confused with the Rainbow Strain.
